

Patient A	
Capability	Deficit
Stamina	10%
Balance	30%
Reaction	10%
Mobility in left lower leg	60%
Strength in left lower leg	80%

Fig. 1

Patient A		Capability prerequisites		
Therapy module	Target capability receiving therapy	Capability 1	Capability 2	
Ergometer training	Capability 1	Not relevant	Not relevant	
Balance exercise	Capability 2	Min. 60%	Not relevant	
Reaction training package A from computer training by company Y	Capability 3	Not relevant	Min. 30%	
Exercise No. 32 from exercise series Z (mobility in lower leg)	Capability 4	Not relevant	Not relevant	
Exercise No. 64 from exercise series Z (strength in lower leg)	Capability 5	Not relevant	Min. 90%	

Fig. 2

Patient A	Status information for therapy modules				
Therapy module	Not relevant	Exercises already prescribed (active or complete)	Useful further exercise options (enabled)	Future useful therapy options (each disabled at present)	Reason for disabling
Ergometer training					
Balance exercise					
Reaction training package A from computer training by company Y					
Exercise No. 32 from exercise series Z (mobility in lower leg)					
Exercise No. 64 from exercise series Z (strength in lower leg)					
Exercise No. 100 from exercise series X (movement in knee)					Wound from operation
